Salto Homelok

All-in-one smart access solution for
residential living

SALTO WECOSYSTEM

Empowering smarter access

The SALTO WECOSYSTEM is more than a group of companies and individuals. We're a community born out of a common goal: empowering access, in every sense - access to places, experiences and opportunities.

Our expert global teams collaborate closely, driven by a dynamic spirit and a shared passion that mean every part of our WECOSYSTEM is fully connected.

Each of our companies embrace the latest technologies and prioritises the open exchange of ideas to unlock new ways of working - So we can keep pushing, keep innovating and keep delivering solutions that enable people to access more together.

We believe that our industry still has a long way to go, and we want to have an active role in the exciting journey ahead.

About Salto

Pioneering facility access, identity management and electronic locking technology that ensures seamless, reliable and secure experiences.

About Salto

Who we are

Salto is a leading global access solutions provider, part of the SALTO WECOSYSTEM.

We develop pioneering facility access, identity management and electronic locking technology that ensures seamless, reliable and secure experiences.

Through close customer relationships and innovative solutions, our global team of experts create timeless and meaningful products that positively impact people and planet

Accelerate the door transition to smart access

Salto aims to have a leading role in the unstoppable process of the massive replacement of mechanical keys with electronic digital keys, which has positioned us as one of the three leading manufacturers of electronic locks worldwide.

Our goal is to develop products and technologies adapted to the global needs of different industries through reliable smart access solutions ecosystem that are easy to install, use, and maintain.

Commitment to quality and information security

Regulatory compliance is essential in building trust and confidence in the effectiveness of our products. Our in-house testing ensures each and every product we sell surpasses the legal standards set by official regulatory bodies.

ISO 9001

These important certifications validate the quality of our products.

ISO 14001

Ensuring consistent building quality and that environmental norms are met.

ISO 27001

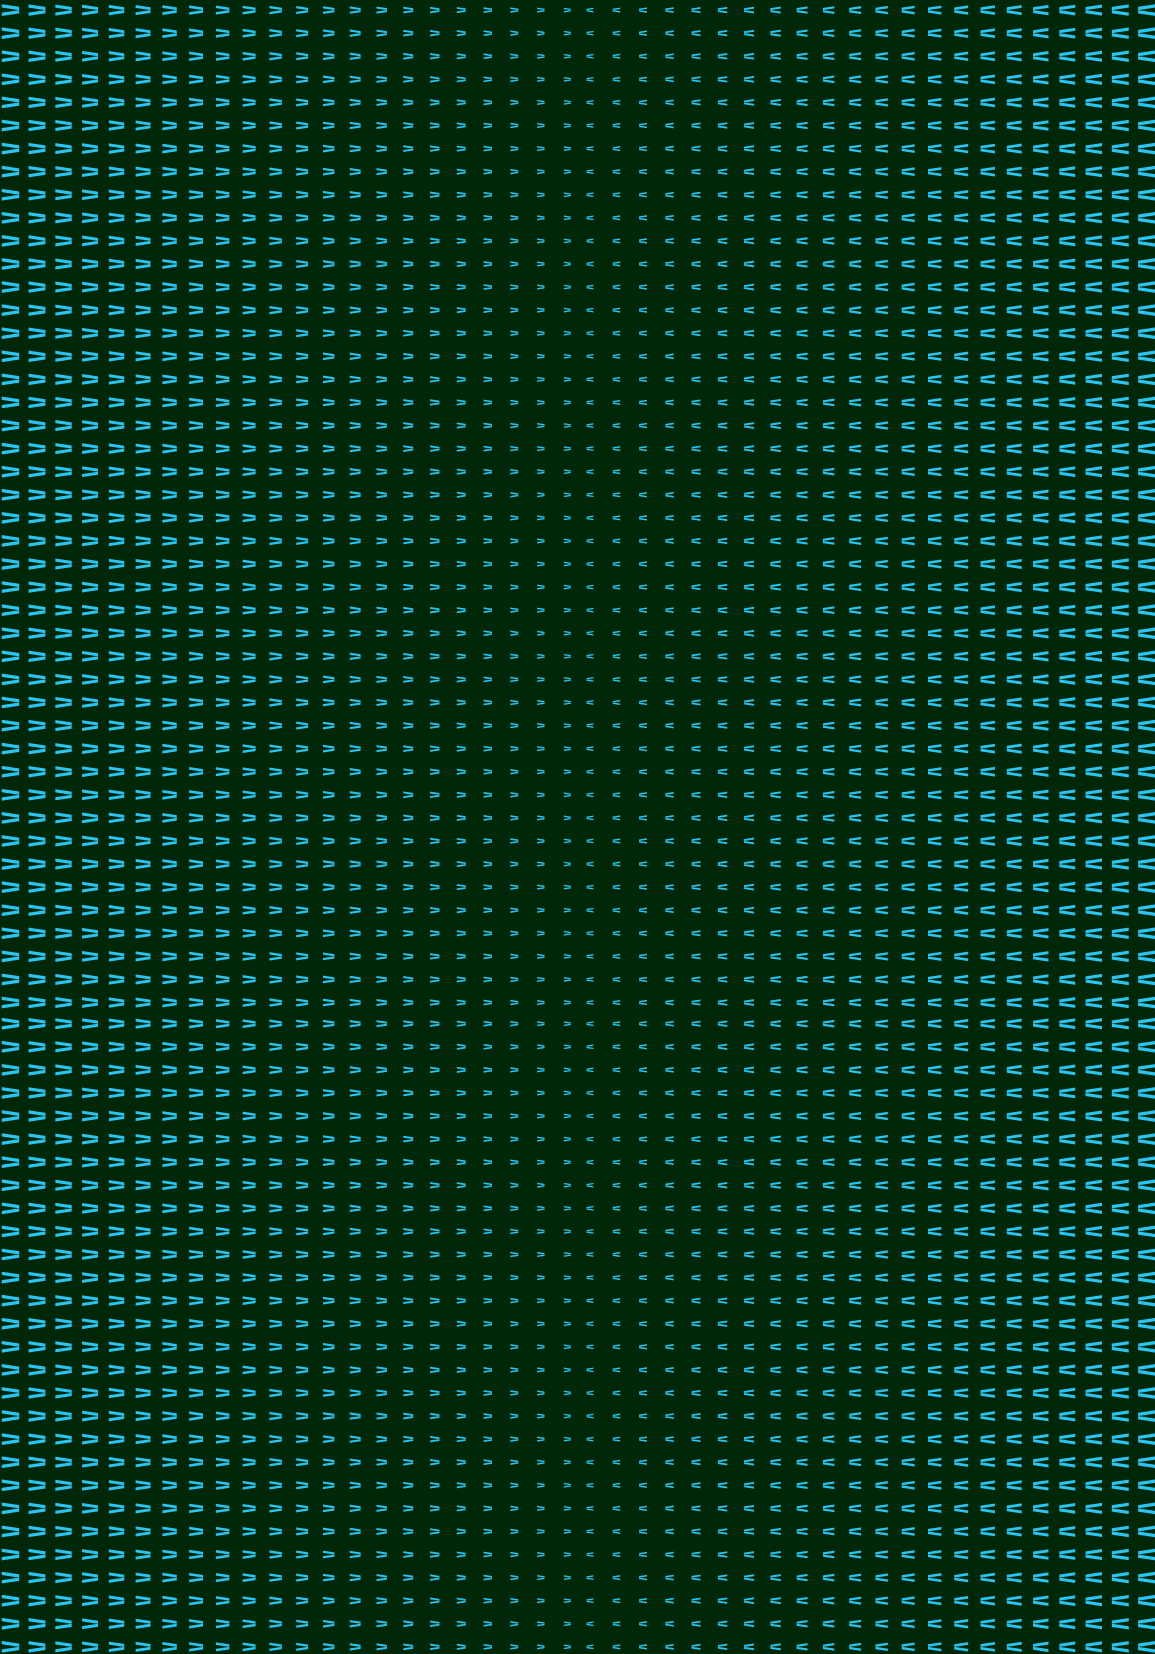

Committed to the highest security and data protection principles.

ECOVADIS

EcoVadis has ranked Salto Systems in the top 25% of companies with the best performance in terms of sustainability policies.

BSI Kitemark™

This cyber/physical security scheme forms the security element of the BSI Kitemark for IoT/Connected products.

Salto Homelok

Salto Homelok enables modern keyless living for residents; streamlines operations for managers and owners, and improves security across all types of residential properties.

Cloud-based Access Control Platform
for the Residential market.

Homelok

All-in-one smart access
solution for residential
living.

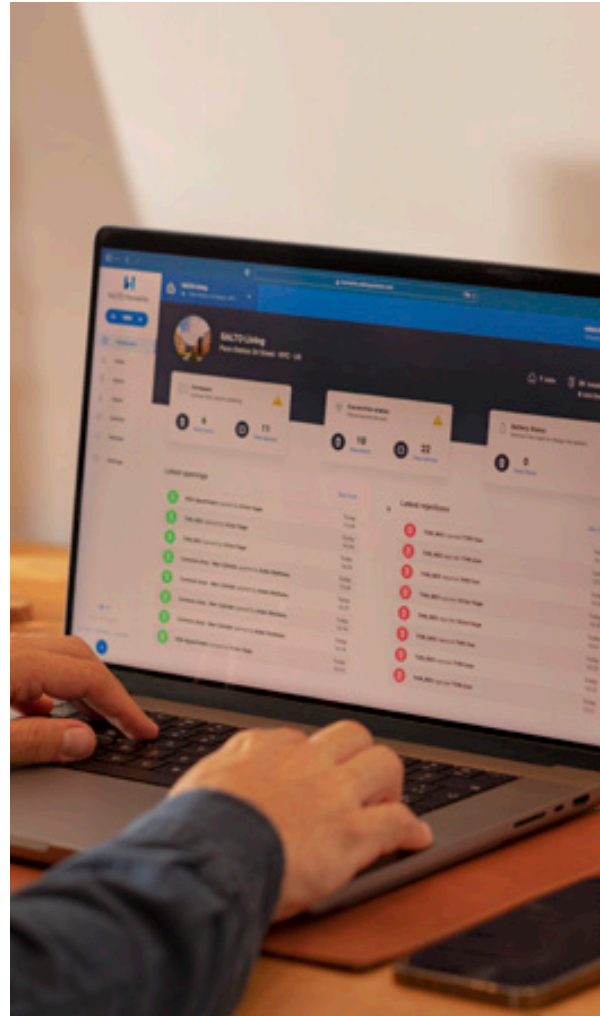

The smart access revolution for residential living.

Salto Homelok enables modern keyless living for residents; streamlines operations for managers and owners, and improves security across all types of residential properties.

Our groundbreaking cloud-based smart access platform with intelligent, wireless, and virtually networked electronic locking technology optimises hybrid deployments and enables the smart building ecosystem without the need for infrastructure.

Main Features

Homelok is a comprehensive solution. It includes both hardware and advanced software technology. It's designed to secure every part of any type of residential property, from apartment unit doors to perimeter access points and common areas.

01

Application

Custom-built for the residential and multi-family real estate industry.

02

Technology

Industry-leading solution with core Salto cloud engine and smart access driver technology.

03

Capability

Existing Salto-based core technology stack including SVN, BLUEnet Wireless, JustIN Mobile, and Apple Wallet.

04

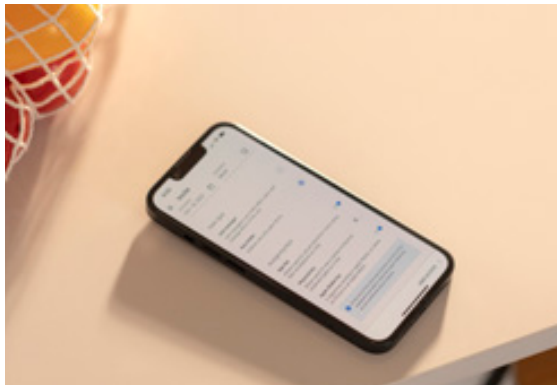

Performance

Full-product offering to secure every type of property and access need, from residential unit doors to perimeter access points and communal areas.

Targets today's challenges in residential living.

Homelok is Salto's smart access solution for the residential, multi-family and smart-living business.

It provides a smart, modern, easy to install and maintain electronic locking solution without the cost and complexity of traditional mechanical access control methods.

Elevates the resident's digital access experience.

Homelok delivers modern smart living, giving residents all the benefits of a convenient, seamless digital experience. By enabling frictionless access and value-added management capabilities, it enhances their day-to-day living.

Future-proof SVN access-driven hybrid technology.

Leverage Salto Virtual Network (SVN) access-driven hybrid technology with a versatile and globally compatible product range that supports your access control requirements as they grow and change, future-proofing your investment.

Enable the smart living ecosystem.

Homelok provides the foundation for a complete smart building ecosystem. It's an open platform that can be fully integrated with property management systems to meet the growing demand for connected home living and provide greater control and visibility.

Streamline operations to boost operational efficiency.

Homelok digital access technology replaces mechanical keys and the inconvenience that comes with losing them. It brings property management into a new era of capabilities, including remote opening; flexible access scenarios; access management for staff, visitors, and residents; and more efficient property management.

Modern, smart and secure Multifamily Properties with smart access control

Designed specifically for residential applications, Homelok's advanced electronic access control solutions set new standards in the industry.

Homelok provides the foundation for a total Smart Building Ecosystem. Open platform architecture means it can be fully integrated with other property management systems to help you meet the growing demand for connected home living, while also providing greater control and visibility across systems.

Cloud software

Streamline your operations.

User-centered, web-based management software gives you ultimate control and blends seamlessly with your existing operations. Homelok's cloud security is unsurpassed in the market.

Access methods

The digital, keyless experience

Homelok helps staff, residents and visitors come and go more easily by replacing the hassle of physical keys with advanced access options - including smartphones.

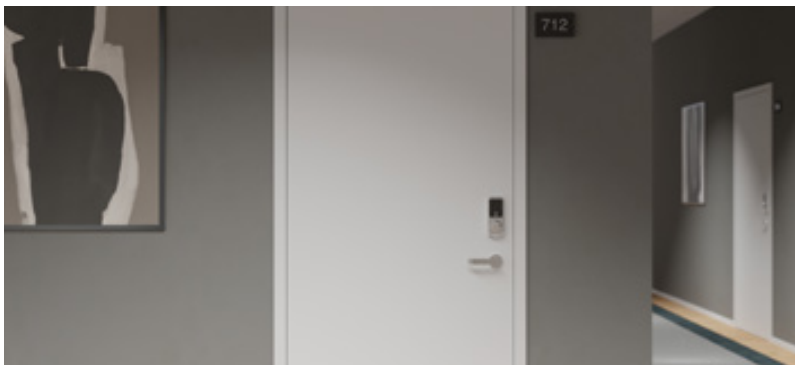

> Smart Keycard

> Digital Key / NFC

> PIN Code

> Apple Wallet

> Door Intercom

Hardware

Electronic locking solutions for every access need.

Homelok's advanced and aesthetically pleasing electronic access control solutions are designed specifically for the residential market. Comprehensive capabilities ranging from individual apartment door management to perimeter access and common area control provide options for residential properties of all types and sizes.

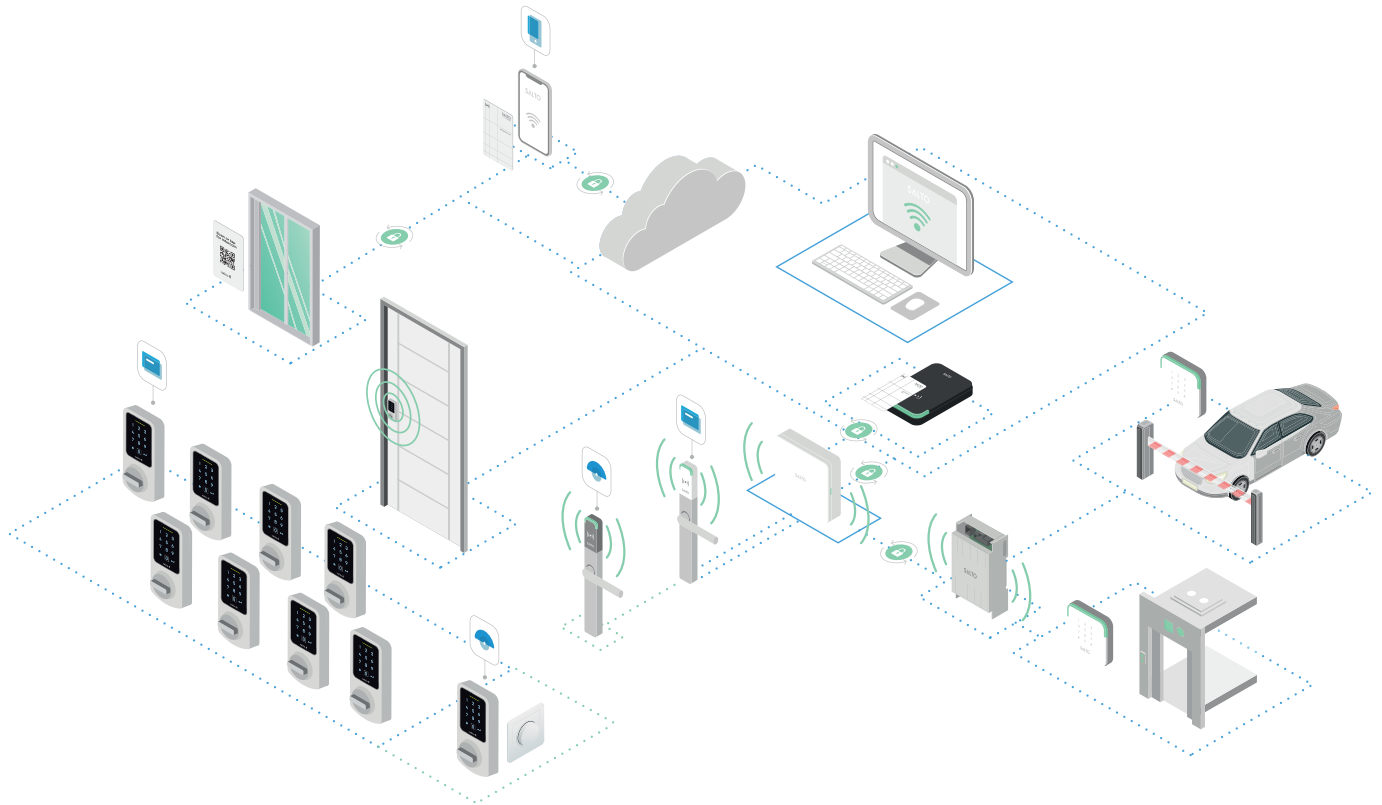

Ecosystem

Integrations-ready to support Smart Living Ecosystems

Salto's collaboration with industry-leading technology partners enables the most comprehensive range of residential offerings. Whether you seek targeted PMS or comprehensive Smart Living Ecosystem solutions.

How Salto Homelok works

Salto KS cloud-based access control is a flexible solution that requires no software installation with remote management capabilities and endless integration possibilities. All you need is a Salto wireless smart door lock, an IQ, and an online device with an Internet connection.

Enhanced Control

User-centered, web-based management software delivers enhanced control, and integrates seamlessly with existing operations.

Electronic Locks and Lockers

Smart, modern designs; easy to install and maintain. Avoids the cost and complexity of traditional mechanical access solutions.

Digital Key

Makes access easier for staff, users & visitors. Options include smartphones (iOS or Android), smart credential, or PIN Code.

Integrations

Open-API methodology allows easy integration with third parties for a comprehensive Smart Building ecosystem.

Robust security, safety and privacy.

Homelok gives both residents and facility managers the reassurance of robust 24/7 security along with unmatched data protection and privacy. Using a unique combination of cloud-based and stand-alone access technology it creates a market-defining level of site safety.

Easier and more secure than using traditional keys

Have full control of all access functions and features from the Homelok web app – from anywhere.

Grants access to authorized smart and mobile credentials for residents, visitors and staff. Share and provide access to visitors or new residents from your apartment unit with a decentralized key management role-based access control feature instantly from your phone, and customize access for each user.

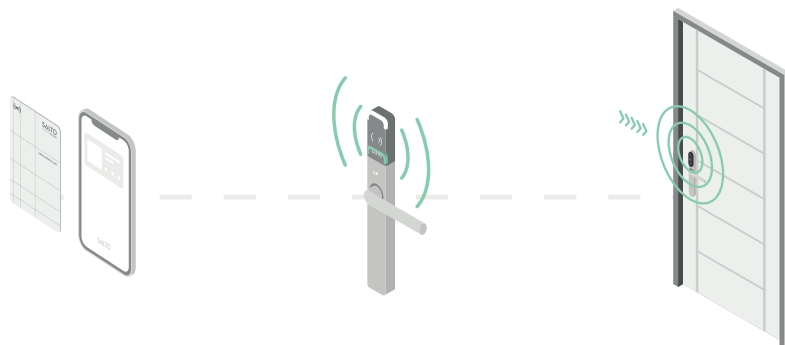

Decentralized key management:

Authorized residents can share and provide access to visitors or new members from their apartment unit account with a decentralized key management role-based access control feature instantly from their phone, and customize access for each user.

Extend the ability to smart access with wire-free SVN networked locks:

Salto's SVN creates a constantly updating access control ecosystem, simply by utilizing residents and users' everyday movements around your property.

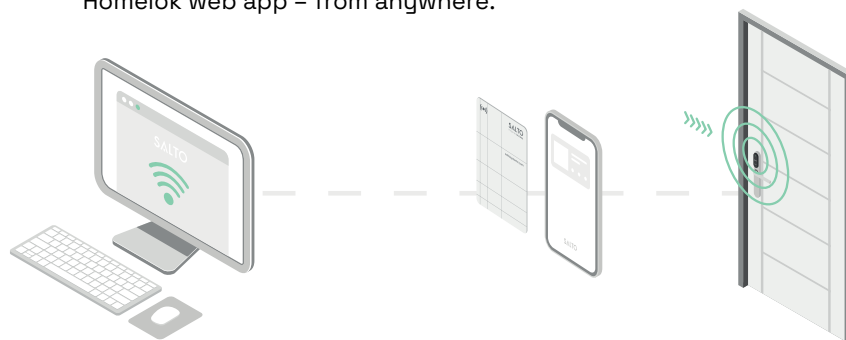

Eliminates the need for expensive wiring; improves speed and operations.

Access permissions are enabled instantly. No more 'walking the site' with programmers to update locks whenever changes are needed.

Enhanced security and convenience:

Have full control of all access functions and features from the Homelok web app – from anywhere.

Smart-access convenience for secure residential living

Salto's smart access control technology for the modern multi-family and residential market provides a smart, modern, and easy to install and maintain electronic locking solution without the cost and complexity of traditional access control solutions.

From main entrances, door intercom, and perimeter access, to individual apartment doors, not forgetting shared amenities, storage facilities, rentable space, garages and elevators, Salto solutions balance premium connected living with security and streamlined management.

Resident Access App

Seamless, keyless and digital resident experience that replaces the traditional home or apartment door key.

Connectivity

Meet growing demand for connected home living with a fully integrated, smart access control solution, compatible with BLUEnet Wireless technology.

Door Intercom

Step into the future of smart access connectivity with XS4 Com cutting-edge door intercom solution, designed to elevate security, residents convenience, and communications in any property.

Unit Apartment Door

All-in-one smart lock designed to blend in to any type of door, any access point and door retrofit.

Unit Apartment Door Solution

DBolt

Technologically advanced, robust and reliable to fit what multi-family and residential customers really need.

The DBolt Touch is a smart deadbolt that simply replaces an existing mechanical deadbolt. The DBolt Touch is an easy-to-install smart lock for the unit door that adds smart features to your lock and maintains the design integrity of your home.

01

Built in a high-quality zinc alloy body.

02

Specially designed to retrofit existing mechanical deadbolts.

03

High-quality intuitive LED display offering multiple unlocking access methods for users.

04

Rated AAA according to A156.40

05
