

ACCESS CONTROL PLATFORM

Salto Space

The pioneering data-on-card smart access solution. Seamlessly connect users, doors, and spaces within your security operations – enabling access anywhere, anytime, in any building.

SALTO WECOSYSTEM

Empowering smarter access

The SALTO WECOSYSTEM is more than a group of companies and individuals. We're a community born out of a common goal: empowering access, in every sense - access to places, experiences and opportunities.

Our expert global teams collaborate closely, driven by a dynamic spirit and a shared passion that mean every part of our WECOSYSTEM is fully connected.

Each of our companies embrace the latest technologies and prioritises the open exchange of ideas to unlock new ways of working - So we can keep pushing, keep innovating and keep delivering solutions that enable people to access more together.

We believe that our industry still has a long way to go, and we want to have an active role in the exciting journey ahead.

About Salto

Pioneering facility access, identity management and electronic locking technology that ensures seamless, reliable and secure experiences.

About Salto

Who we are

Salto is a leading global access solutions provider, part of the SALTO WECOSYSTEM.

We develop pioneering facility access, identity management and electronic locking technology that ensures seamless, reliable and secure experiences.

Through close customer relationships and innovative solutions, our global team of experts create timeless and meaningful products that positively impact people and planet

Accelerate the door transition to smart access

Salto aims to have a leading role in the unstoppable process of the massive replacement of mechanical keys with electronic digital keys, which has positioned us as one of the three leading manufacturers of electronic locks worldwide.

Our goal is to develop products and technologies adapted to the global needs of different industries through reliable smart access solutions ecosystem that are easy to install, use, and maintain.

Commitment to quality and information security

Regulatory compliance is essential in building trust and confidence in the effectiveness of our products. Our in-house testing ensures each and every product we sell surpasses the legal standards set by official regulatory bodies.

ISO 9001

These important certifications validate the quality of our products.

ISO 14001

Ensuring consistent building quality and that environmental norms are met.

ISO 27001

Committed to the highest security and data protection principles.

ECOVADIS

EcoVadis has ranked Salto Systems in the top 25% of companies with the best performance in terms of sustainability policies.

BSI Kitemark™

This cyber/physical security scheme forms the security element of the BSI Kitemark for IoT/Connected products.

Salto Space

The pioneering data-on-card smart access solution. Seamlessly connect users, doors, and spaces within your security operations – enabling access anywhere, anytime, in any building.

Access Control Platform

Space

The pioneering data-on-card smart access solution.

Seamlessly connect users, doors, and spaces within your security operations.

Elevate your smart access experience with our integrated access control solution. Salto Space revolutionises building security and operations with keyless convenience, enabling the digitalisation of buildings across all industries.

Do more with a pioneering, virtually networked, data-on-card-based locking system. Experience unified, scalable security combined with integration support and limitless features to manage your building operations.

Main Features

Salto Space is a reliable, on-premise access control solution with a unified software and hardware architecture and an open security ecosystem.

Designed to secure any door in a building and make access control more effortless than ever, it provides your business with a flexible platform to manage unlimited locations – all from one dashboard.

01

Application

Comprehensive on-premise access control solution with enterprise-class security for modern buildings. Designed to support any number of users, access points, and sites, it's ideal for medium to large installations.

02

Technology

SVN smart access technology that provides wireless data-on-card solutions with integration capabilities and limitless features to help future-proof your building security.

03

Capability

SVN smart access technology that provides wireless data-on-card solutions with integration capabilities and limitless features to help future-proof your building security.

04

Performance

Gain activity insight and notifications for specific events, including rejected entries, doors left open, or system maintenance tasks.

Smart standalone, virtually networked, all-in-one access control platform

Combine the reliability, security and scalability of an on-premises access control solution with the flexibility and availability of stand-alone networked electronic lock technology.

Salto Space platform is an easy-to-use system that integrates all physical security needs through networked, wireless, battery-operated smart locks.

SVN data-on-card solution

Unlock a new era of access control with Salto Space.

Virtually networked, smart access technology for a simplified, on-premise access control system.

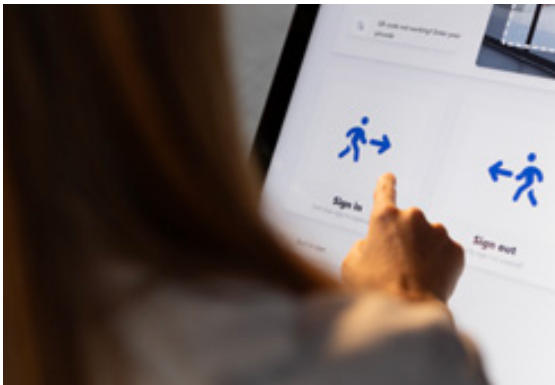

Seamlessly integrate non-connected locks to system operations, creating a wire-free environment that enhances your 24/7 security and convenience.

Say goodbye to mechanical keys

Leverage the latest smart credentials and mobile technology for reliable, effortless entry and access control management.

Provide users with a keyless access experience while offering fast and frictionless access. Say goodbye to complex installations and mechanical keys with leading keyless and mobile access technology designed for ultimate flexibility and control.

Manage access and the security of your building to optimise operations for enhanced safety and efficiency

Secure your premises and prevent unauthorised entry, with best-in-class access control technology, leveraging a completely wire-free environment.

Enhance security at every level with leading smart access technology designed for ultimate flexibility and control. Benefit from fast, secure and convenient management of doors, sites and users on a single on-premise access control platform.

Trusted and scalable smart access solution to simplify maintenance and deployment.

Simplify the installation and management of your access control with our easy-to-use, cost effective, all-in-one solution that does not require additional door wiring.

Experience unified, scalable access control platform with limitless support for integration across a growing ecosystem. Our secure, and reliable access control platform provides an enterprise-grade security.

Achieve simplified, centralised secure access management control and maintenance with Salto Space's networked lock technology.

Seamlessly connect users, doors and spaces within your security operations

The Salto Space is the industry-leading all-in-one access control systems and data-on-card technology platform.

Designed for ultimate flexibility and administrative control, Salto Space offers a range of building access control security systems, software capabilities, electronic locking solutions to safeguard every access point and interior space with smart and mobile access state-of-the-art technology to integrates all physical security needs.

Software

Enterprise-grade software

Comprehensive physical access control platform and web-based software management system that brings seamless access to every door in any building for organizations of all sizes.

Credential

Say goodbye to mechanical keys and lock replacement.

Keyless and mobile convenient smart access ways to open any door.

- > Smart Keycard (SVN)
- > Mobile access and digital key
- > PIN Code credential
- > Face Recognition
- > Vehicle Access

Hardware

Smart, high-tech locking solutions for any door.

Designed to be easy to instal and retrofit on existing doorsl, without requiring additional infrastructure, allowing you to keep your original doors and locks in place making installation quick, simple, and cost-effective.

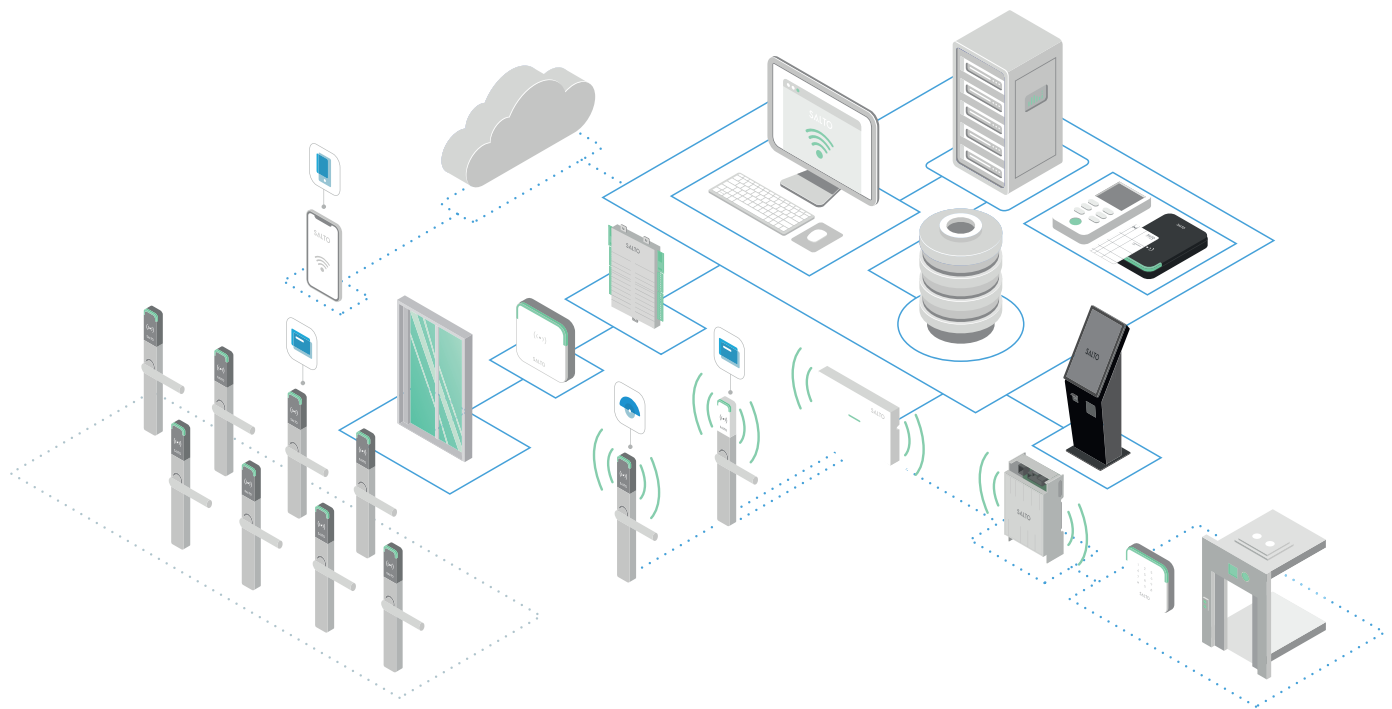

Integrations

Seamlessly integrate with third-party systems.

Experience the power of integration with Salto Space and unlock a new level of control and flexibility.

How it works

Salto Space's virtually networked data-on-card, smart access technology integrated within a single platform to make the access control management of any building simple.

Enhanced Control

On-premise web browser-based access control platform and mobile-enabled solution provides the flexibility to respond to alerts from anywhere.

Electronic locks, readers, controllers, lockers, and more...

A range of building access control systems and locking solutions to protect every access point, turnstile, elevator, parking, interior door, gate, interior doors, storage and locker room.

Digital Key

Makes access easier for staff, users & visitors. Options include smartphones (iOS or Android), smart keycard, PIN Code and Face Recognition.

Integrations

Designed to provide ultimate convenience, efficiency, and security, allowing you to effortlessly manage access across your entire facility.

Robust security, safety and privacy.

We take security, privacy, and regulatory matters seriously. The Salto Space infrastructure is continuously updated and maintained. Salto Space is constantly updated so that it is compatible with new hardware releases from Salto Systems.

As an ISO 27001-certified business, we have capable security tools in place to ensure data security, stability and availability of the platform. We regularly carry out penetration tests to evaluate our different security mechanisms.

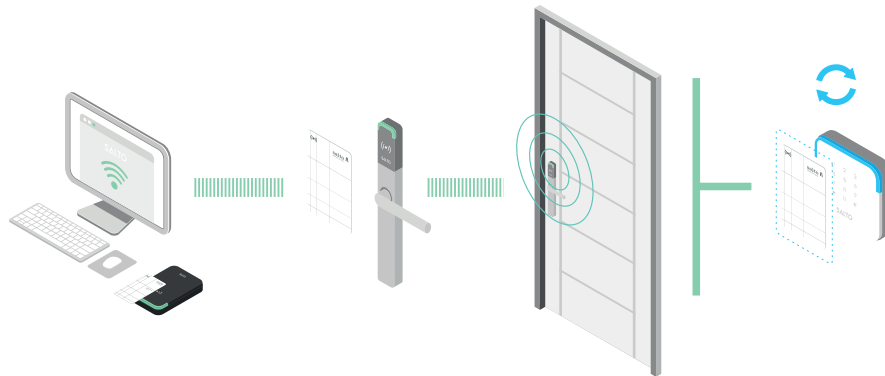

Streamline security with industry-leading access control platform

Access control management made simple with limitless capabilities.

Salto Space is a scalable and advanced on-premise access control solution built for modern buildings. Effortlessly secure every door, gate, elevator and access point with future-proofed access control. It allows system administrators to efficiently manage their security while providing an intuitive, keyless user experience.

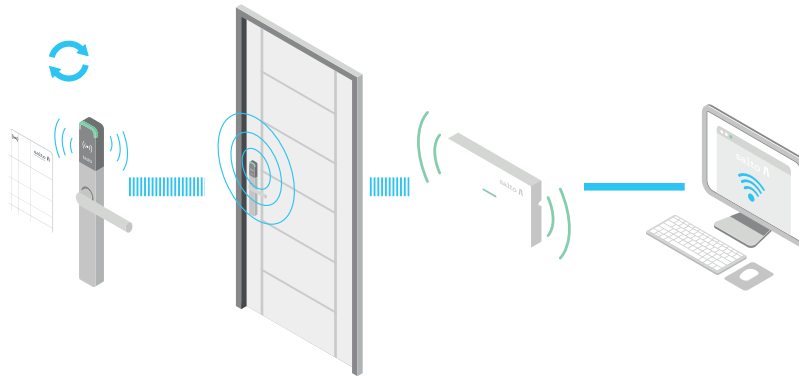

SVN Data-on-Card

Efficiently grant permissions, restrict or update users' access to different parts of the building. Effortlessly update user access permissions and access levels with SVN technology.

BLUEnet Wireless

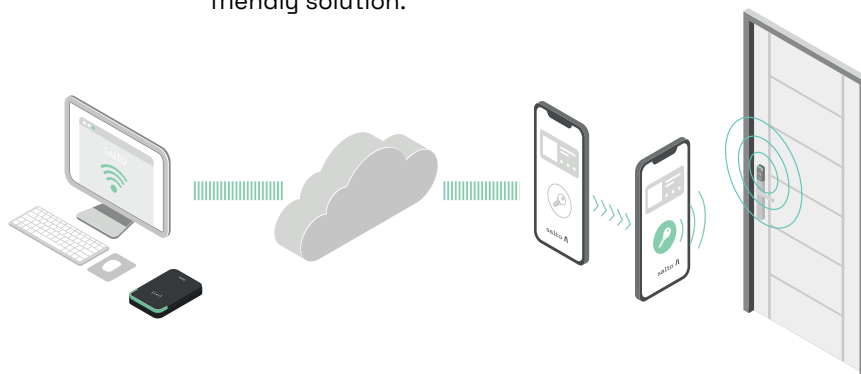

Update user credentials thanks to SVN-Flex technology and instantly cancel keys after loss for enhanced security.

Receive all the latest users' access information for all doors in your facility.

JustIN Mobile / Digital Key

Allows system administrators to manage their building while providing a better user experience through a keyless and mobile-friendly solution.

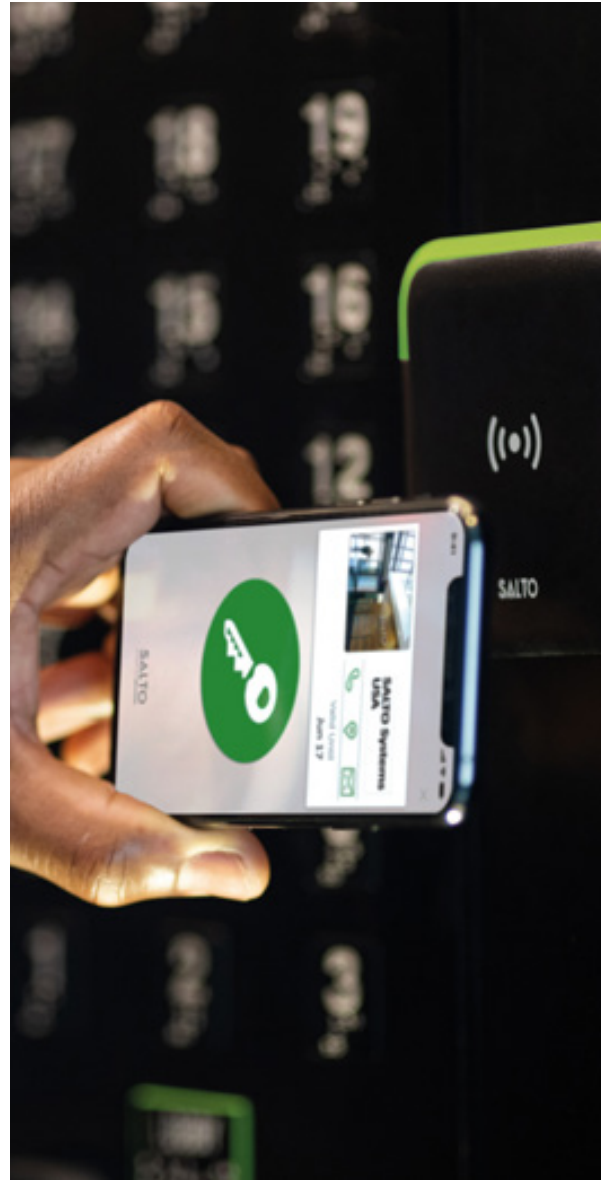

The technology works by using NFC or Bluetooth Low Energy (BLE) to communicate between the user's mobile device and the access point smart lock.

Smart access control technology for safer, more secure spaces

Salto Space is a powerful SVN based standalone wire-free platform designed to manage and secure access control.

On-premise and server-based, it integrates both networked hardware and software components to provide seamless, scalable wireless security management through several leading-edge features:

Pioneering technology

Transforms access control, affordably saving in installation and operating costs. Avoid expensive cabling with wire-free SVN access control technology to secure any entry point.

Improved security and streamlined operations

Eliminate mechanical keys and simplify operations with precise, automated access permissions. Reduce the need for physical keys and rekeying, leading to lower operational costs over time.

Reporting and monitoring

Increase visibility with 24/7 real-time monitoring and access control management.

Integration

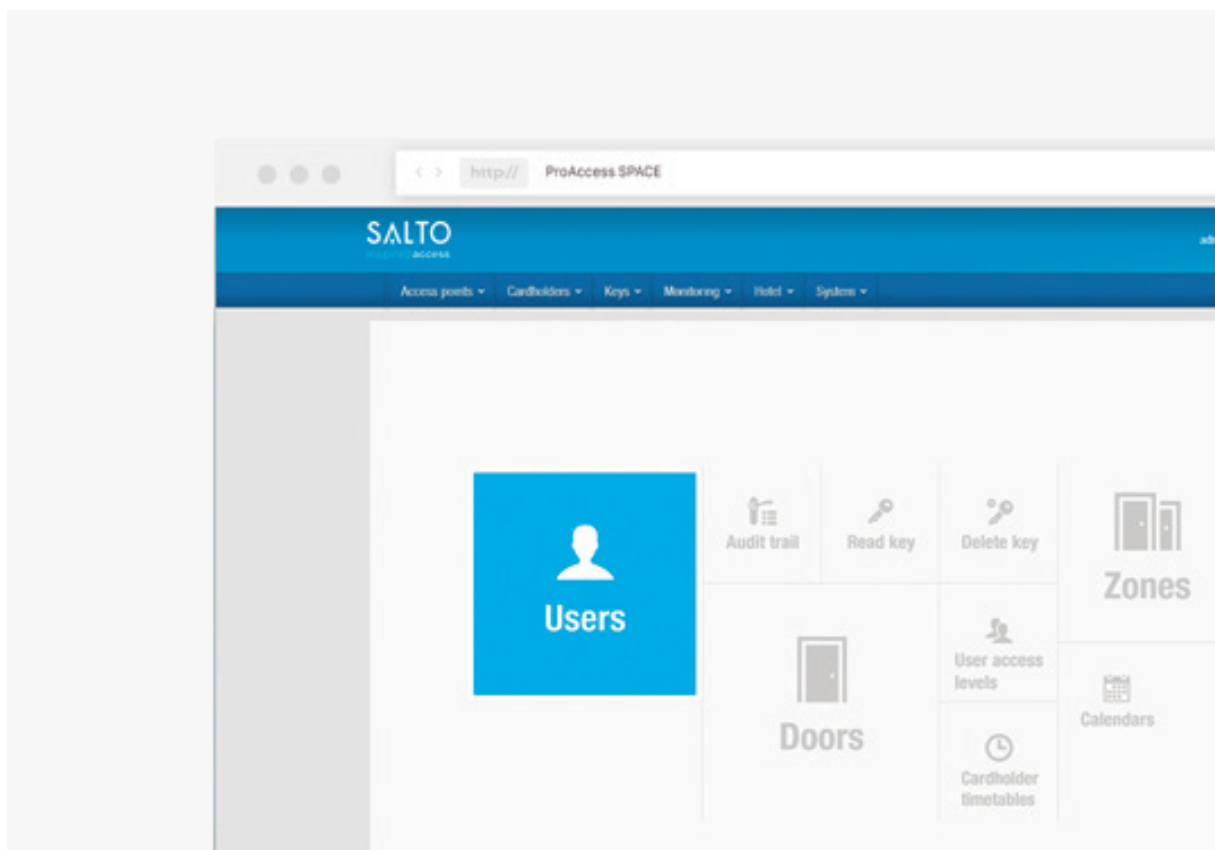

Scalability and flexibility delivered by solutions that adapt to the evolving needs, supporting new installations and integrations as required.

Management Software

ProAccess

Get the flexibility and functionality you need with Salto ProAccess Space management software. An intuitive user-centered, web-based interface enables systems operators to complete a myriad of tasks and manage access across multiple zones, areas or partitions 24/7, from a single interface.

Designed to work seamlessly in any building, ProAccess Space operating system modular architecture lets users choose and adapt the system platform for the features and functions that best address your operational, security and safety needs.

Web-based

100% browser-based access control software, revolutionizing the way you manage and protect your spaces.

Customizable and highly secured

Robust security protocols, multi-factor authentication, and regular system updates.

Audit-trail and advanced alarm management

Gain unparalleled visibility and control over access events, as well as the ability to effectively respond to security incidents.

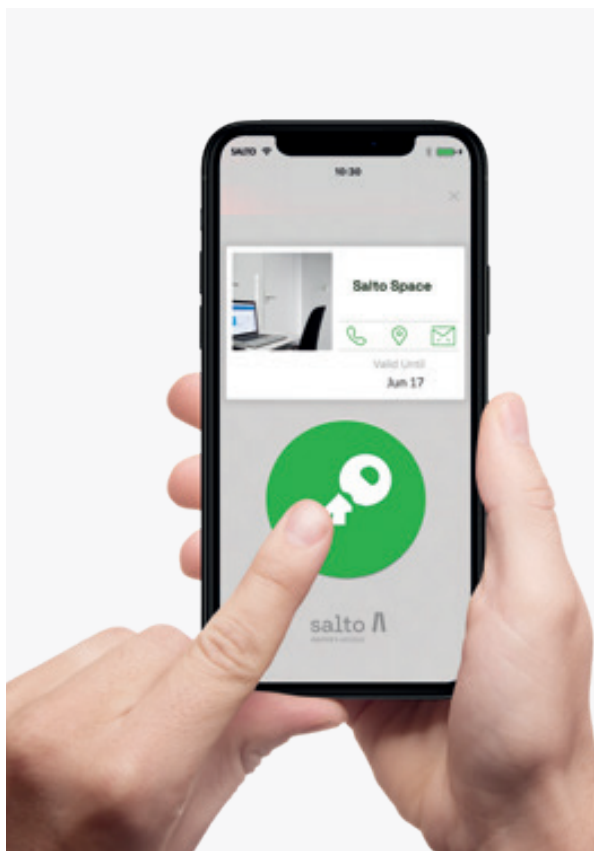

Manage users, visitors and access rights

Configure access levels, permissions, and user roles according to specific requirements,

Mobile Access

JustIn App

Transform your property into a global, mobile environment with Salto JustIn Mobile smartphone-based key and access control technology.

JustIN Mobile App

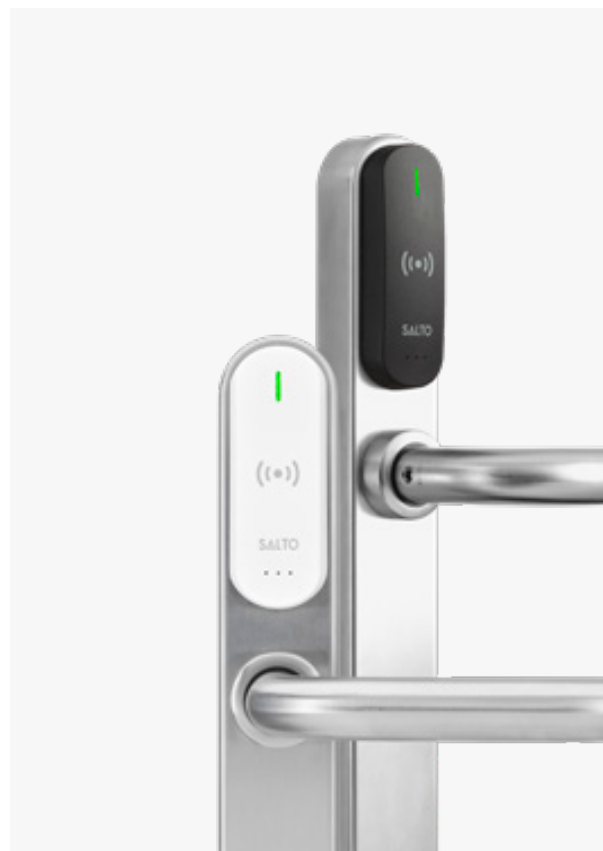

Replace the need for physical keys or keycards by incorporating smartphones into your access control routine. With the SALTO JustIN Mobile app, your smartphone is your key.

Electronic Locking Technology

XS4

The Salto XS4 electronic smart door lock model delivers next-level security, customisation, and keyless smart access control.

Choose from a wide range of designs, finishes, locks, and reader options and models to delivers next-level security, customisation, and keyless smart access control.

Install and retrofit standard doors effortlessly.

One of the standout features of the XS4 electronic locking models is its effortless installation and retrofitting capabilities. With a blend of appealing design and sophistication, robustness, and advanced smart access technology, this electronic lock is the perfect solution for any building or door.
